MUHAMMAD FACHRURROZY

Renewable Energy Engineer

ABOUT ME

A student of Engineering Physics at Gadjah Mada University (UGM), focusing his research on the planning and modeling of new and renewable energy systems. He has experience in GIS-based land suitability analysis, as well as energy mix simulations to support long-term energy transition scenarios. He is committed to producing objective, measurable, and defensible technical recommendations, both scientifically and regulatory-wise.

EDUCATION

Gadjah Mada University | 2022-Present
Engineering Physics

State Vocational School 1 Karawang | 2019-2022
Mechanical Engineering

WORK EXPERIENCE

Undergraduate Thesis Research | 2026 - Present

Renewable Energy Researcher & Energy System Modeler

Focused on renewable energy system planning, environmental analysis, and GIS Analysis. Experienced in spatial analysis, renewable energy potential studies, and environmental data processing, as well as energy and water resource modeling.

UGM Community Service Program | June 2025

Student Coordinator

Developed and implemented technology-based community projects, including an automatic plant watering system (ESP8266 + soil moisture sensor), an automatic lighting system (BH1750), and biopore infiltration initiatives in collaboration with the local Women Farmers Group.

PT Jasa Kita Bersama | January 2025

Internship

Assisted in engineering documentation and technical drafting processes, including the preparation, revision, and organization of engineering drawings and project-related technical documents to support ongoing engineering activities.

SKILLS

Professional

- Autocad 3D
- QGIS
- LEAP
- PlatformIO
- SAM (System Advisor Model)
- Blender3D
- Web Designer
- Figma
- Unreal Engine 5

Personal

- Leadership
- Team Collaboration
- Problem Solving
- Critical Thinking
- Adaptability

LANGUAGES

- Indonesian – Native Speaker
- English – Intermediate
- German - Beginner
- Chinese - Beginner
- Japanese - Beginner
